BLACK GOLD®

Black Gold® Moisture Supreme Container Mix 0.10-0.06-0.13

- RESILIENCE®, our trade name for Silicon (Si), is a beneficial plant substance. Plants grown with our RESILIENCE® silicon, already in our mix, may result in earlier flowering, better root growth, and improved resistance to wilting. Your results will vary by plant type and how you grow your plants.
- Specifically formulated for all your patio containers, hanging baskets and window boxes
- Includes coir for moisture retention
- Provides excellent aeration for superior root growth
- Feeds plants up to six months
- Contains earthworm castings - nutrient rich, biologically active and improves the ability of your soil to retain moisture

How to Use Black Gold® Moisture Supreme Container Mix

1 Choose Container:
Choose pots to fit your planting. If adding several plants to a pot, make sure it is large enough to support full growth. When transplanting, select a container slightly larger than the old. Make sure it has drainage holes and a bottom saucer to catch water. Cover large drainage holes with a piece of screen or pebble layer for mix retention.

2 Transfer: Carefully tip and remove a plant from its old container, keeping its root ball intact. If plants are pot-bound, gently loosen the roots for better soil-to-root contact.

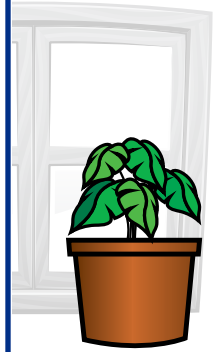

3 Planting: Add a layer of mix at the bottom of the new container, leaving space for plantings. Depth and amount needed will depend on pot and plant sizes. Center or place plants as desired, and fully cover the roots with fresh mix, leaving a 1-2-inch space at the top for watering. Gently press the mix down and brush excess away from stems or leaves.

4 Watering & Feeding:
Water the soil until the bottom saucer is filled. Monitor soil-moisture levels, and water plants once soil feels dry down to a 1-2-inch depth. For better growth and flowering, feed plants regularly with a fertilizer formulated for your plantings. Follow the manufacturer's recommendations.

5 Growing Environment:
Know the light, temperature, moisture, and humidity needs of your plants. Provide them with the best growing environment for their needs.
